

Meeting Summary

Here's a moderately detailed summary of the group conversation:

Key Decisions:

- Code freeze at 11 PM tonight to ensure no more merges after that
- Final release candidate deployed successfully to production environment (v1.0.0-local)
- Server autoscaling rules adjusted to handle increased traffic
- User testimonials to be captured from early adopters

People Involved:

- Mark S: lead developer, responsible for final build, deployment, and issue resolution
- Helly R: QA engineer, running smoke tests and identifying UI issues
- Irving B: marketing lead, coordinating with the team on launch preparation and press materials
- Dylan G: product manager, overseeing pricing matrix, subscription tiering, and analytics

Action Items/Deadlines:

- Mark S to profile and fix delayed push notifications on Android 14
- Helly R to retest signup flow after dependency freeze and prepare final release notes
- Irving B to capture user testimonials from early adopters
- Dylan G to prepare outreach list for user testimonials
- Team to monitor metrics closely and adjust server autoscaling rules as needed

Timeline:

- Code freeze tonight at 11 PM
- Final release candidate deployed successfully (v1.0.0-local)
- Server autoscaling rules adjusted to handle increased traffic
- User testimonials to be captured from early adopters
- Team review on Monday to discuss progress and metrics
